"Analysis of a 36.2 kb DNA sequence including the right telomere of
chromosome VI from Saccharomyces cerevisiae.",
Yeast 12:149-167(1996).
-!- FUNCTION: Associates with the SIT4 phosphatase in a cell cycle
dependent manner. May be directly or indirectly involved in
SIT4-dependent functions in budding and in normal G1 cyclin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         262;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  TOTA1-788(2002).

TUNCTION: Involved in chromosome cohesion during cell cycle and in DNA repair. Central component of cohesin complex. The cohesin complex is required for the cohesion of sister chromatids after DNA replication. The cohesin complex apparently forms a large proteinsceous ring within which sister chromatids can be trapped. At anaphase, the complex is cleaved and dissociates from chromatid, allowing sister chromatids to segregate.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     IDENTIFICATION IN A COHESIN COMPLEX WITH SMC1; IRR1 AND MCD1, AND INTERFACTION OF THE COHESIN COMPLEX WITH SCC2.

-!- SUBUNIT: Cohesin complexes are composed of the SMC1 and SMC3 heterodimer attached via their hinge domain, MCD1/SCC1 which link them, and IRR1/SCC3, which interacts with MCD1. The cohesin complex also interacts with SCC2, which is required for its association with chromosomes.
-!- SUBCELLULAR LOCATION. Nuclear protein. Associates with chromatin. Before prophase it is scattered along chromosome arms. At anaphase, the MCD1 subunit of the cohesin complex is cleaved, leading to the dissociation of the complex from chromosomes, allowing chromosome separation.
-!- DOMAIN: The flexible hinge domain, which separates the large intramolecular coiled coil regions, allows the heterotypic interaction with the corresponding domain of SMC1, forming a viame of the corresponding domain of SMC1, forming a connected by different ends of the cleavable MCD1 protein, forming a ring structure (89 similarity).
-!- SIMILARITY: Belongs to the SMC family. SMC3 subfamily.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       262

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             999
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    300
pore-forming toxins (AAM52113 and AAM51484-AAM51500), especially mutants in the B moiety of the pore-forming binary A-B anthrax toxin, where the B moiety is anthrax protective antigen (PA) and using these mutants or compositions of them for protecting against Bacillus anthracis infections in humans, especially as vaccines. Note: The present sequence is not given in the specification but is derived from the Bacillus anthracis wild-type PA protein sequence shown in figure 13 (AAM51433)
